

U.S. ENVIRONMENTAL PROTECTION AGENCY  
NOTIFICATION OF HAZARDOUS WASTE ACTIVITY

**INSTRUCTIONS:** If you received a preprinted label, affix it in the space at left. If any of the information on the label is incorrect, draw a line through it and supply the correct information in the appropriate section below. If the label is complete and correct, leave Items I, II, and III below blank. If you did not receive a preprinted label, complete all items. "Installation" means a single site where hazardous waste is generated, treated, stored and/or disposed of, or a transporter's principal place of business. Please refer to the INSTRUCTIONS FOR FILING NOTIFICATION below completing this form. The information requested herein is required by law (Section 3010 of the Resource Conservation and Recovery Act).

PLEASE PLACE LABEL IN THIS SPACE

In Reply Refer To: 3EN32

Gary Galida, Chief  
Division of Hazardous Waste Management  
Department of Environmental Resources  
P.O. Box 2063  
Harrisburg, Pennsylvania 17120

Dear Mr. Galida:

Recently EPA conducted compliance monitoring inspections in Pennsylvania to determine whether certain hazardous waste management facilities were in compliance with regulations promulgated under the Resource Conservation and Recovery Act. These inspections were conducted as part of EPA's overview of the State hazardous waste program, and in accordance with the Memorandum of Understanding in effect at that time between EPA and the Department of Environmental Resources. Based on our review of these inspection reports, we have determined that several of the facilities are in violation of standards applicable to generators and/or owners and operators of hazardous waste treatment, storage and disposal facilities. We believe that these violations are significant and may result in environmental harm if not corrected.

The Memorandum of Understanding designates the Department as the primary authority in Pennsylvania for taking timely and appropriate actions against persons in violation of standards applicable to hazardous waste management facilities. This includes violations detected during State or Federal compliance evaluation inspections. It is, therefore, EPA's responsibility to inform the Department whenever Federal inspections identify facilities in violation of the standards referenced above.

In light of that responsibility, EPA is recommending that the following facilities be considered as candidates for follow-up action by the Department:

Pioneer Salt and Chemical Co.  
Philadelphia, Pennsylvania  
EPA I.D. No. PAD 065728826

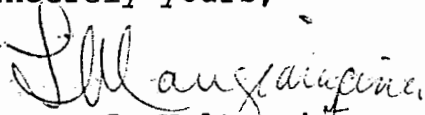

Chem Clear, Inc.  
Chester, Pennsylvania  
EPA I.D. No. PAD 000731026

Scott Paper Co.  
Chester, Pennsylvania  
EPA I.D. No. PAD 002274991

We would appreciate being kept informed about any action taken by the Department. In the event the Department may want to initiate a joint action or defer action to EPA with regard to these or any other facilities, we would be happy to discuss any individual case at your convenience. If the Department fails to initiate follow-up action, EPA reserves the right to take action at a later date. EPA will, of course, inform the Department prior to taking any such action.

We have attached all EPA inspection checklists, trip reports and technical reviews to assist you in your evaluation of these facilities. If you require any additional information or have any other questions please call Gil Horwitz at (215) 597-0568.

Sincerely yours,

Thomas C. Voltaggio  
Acting Director, Enforcement Division

APR 22 1981

Mr. Frank Seklecki, Operations Manager  
 Pioneer Salt and Chemical Company  
 940 N. Delaware Avenue  
 Philadelphia, PA 19123

Dear Mr. Seklecki:

This is in response to the inquiry which you made to EPA inspectors Bill Hagel and John Harsch during a RCRA compliance inspection on March 20, 1981. You asked about the status of "off-spec" material, which must be disposed of, after attempts to sell the product have failed.

According to Mr. Ralph Siskind of our Legal Branch, a material which becomes a waste on-site is considered to be generated by that facility. At the time a facility declares a material unusable and non-sellable, and wishes to dispose of said material, that material should then be declared a waste.

If you have any further questions on this subject, please contact Mr. William Hagel of my staff at (215) 597-9843.

Sincerely,

Bruce P. Smith, Chief  
 Environmental Emergency Branch
